

## Universal Filter Housings for Temperatures up to 210°C (410°F)

FHU Series filter housings fit standard Code 0 filter cartridges offered by major suppliers. They provide high flows in PTFE/PFA fluid paths with reliable dual-static crush seals that can be retightened. These compact filter housings are nonmetal, capable of 210°C (410°F) fluid temperatures, and enable changing filters without disconnecting liquid lines.

### Advanced Technologies

Compatible with Code 0 filters

Low pressure drop (1-in flow path)

Reliable, adjustable O-ring seals

Synchro-Thread™ allows for fluids up to 210°C (410°F)

Greater filtration surface area with up to 3.2-in diameter filters

Various fitting options

Easy to install in any orientation

Adjustable pin maintains placement of filter when in inverted position

\*Filter not provided by White Knight. See Dimensions to ensure filter fit.

### Features & Benefits

- Compatible with Code 0 filter cartridges
- Process-safe PTFE, PFA flow paths
- Reliable, safe operation with leak-free dual-static crush seals
- Durable machined design with no metal parts
- Enables up to 3.2-in filter diameters for greater filtration surface area
- Synchro-Thread™ provides face and diameter seals with doubled-threaded strength for complete, reliable containment
- Adjustable pin to keep filter in place when inverted and in thermal cycling applications
- Change filters without disconnecting liquid lines
- Easy to configure, install and service
- Low pressure drop (1-in flow path)
- Max pressure at 70°C is 7 Bar (100 psi)  
Max pressure at 210°C is 1.4 Bar (20 psi)
- Class 100 cleanroom assembly and packaging
- No preventative maintenance during warranty

### Dual-Static Crush Seal

Two O-rings in an angled load system ensure reliable seals to prevent leaks. Sealing pressure can be adjusted beyond initial compression loads. They maintain pressure and prevent leaks, which improves reliability, and eliminates costly downtime and expensive cleanup.
