# HX50 COMPACT HEATERS

COMING SOON – NOT RELEASED FOR SALE – SPECIFICATIONS MAY CHANGE

## Ultrapure Heaters with Compact Footprints for Point-of-Use and Low-Flow Applications

HX50 in-line heaters feature compact 50-mm (2-in) housings. These low wattage heaters are perfect for point-of-use and low-flow applications where space is limited. Their PFA fluid paths are optimal for aggressive fluids. The heaters utilize the low-mass Heateflex<sup>®</sup> heating element with low watt density to provide fast, powerful temperature response.

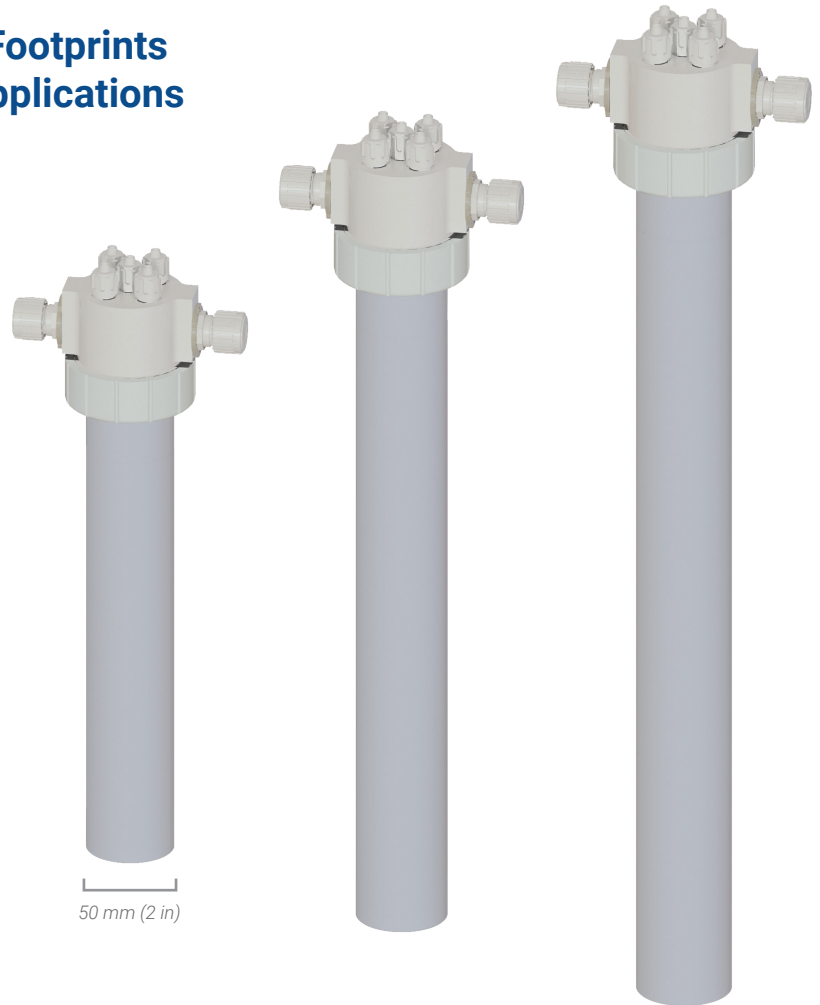

*Specifications coming soon. Contact White Knight for details.*

### Features & Benefits

- Ultrapure PFA wetted surfaces for optimal chemical compatibility
- Compact footprint in 50-mm (2-in) housings
- 1-3 kW models available

### Applications

- Chemical Heating
- Low-Flow Heating
- Point-of-Use Heating
